ROLEC COMPANY OVERVIEW

Rolec Services Ltd., of Boston, Lincolnshire, in the UK is comprised of 6 unique divisions, each focusing on a particular industry. We are widely considered to be one of the world's leading specialists in the design, manufacture and installation of both indoor and outdoor electrical charging, connection, hook-up and distribution equipment.

Established in 1990 and presently employing around 100 people in our new, purpose-built office/showroom/warehouse/factory/training academy complex, our product range is now regarded as the largest and most extensive of its kind in the electrical industry and continues to grow via our network of representatives and distributors in over 40 countries around the globe.

SU1 Static Hook-Up Unit

The SU1 is a hard-wearing, cost effective hook-up unit specifically designed to provide either a 6amp, 10amp, 16amp, or 32amp unmetered electrical supply via a BS4343 IP44 electrical socket to the static caravan.

Each unit comes complete with an RCBO providing both overload and 30mA fault current protection accessible via a waterproof customer re-set flap, as well as a set of 3 x 35mm incoming cable connection terminals.

Product codes:

- LSAA0010 – SU1 - 16amp – skt
- LSAA0030 – SU1 - 32amp – skt
- LSAF0060 – 1500mm x 3mm Galv Post

ROLEC LEISURE SERVICES DIVISIONAL OVERVIEW

Rolec Leisure Services is a division of Rolec Services Ltd., and has firmly established itself as the UK's leading company specialising in the design, manufacture and installation of electrical hook-up and metering systems, electrical distribution systems and park lighting solutions to the leisure industry.

Our enviable reputation has been built on 20 years of both continuous development and collective experience on some of the world's most prestigious leisure industry projects.

As the nation's largest manufacturer of hook-up and electrical distribution equipment, Rolec has the greatest buying power in the industry and as such, is consistently able to offer the UK's most competitive prices.

We pride ourselves on being the leading innovator of utility services to the leisure industry. Many of the products that we develop are initially unique to our company and almost always become benchmarks in the industry that are later emulated by others.

Static Caravan Hook-Up Units

SU2 Static Hook-Up Unit

The SU2 is a hard-wearing, cost effective hook-up unit specifically designed to provide a kWh metered electrical supply in either 6amp, 10amp, 16amp, or 32amp via a BS4343 IP44 electrical socket to the static caravan (optional SmartCard Metering available).

Each unit comes complete with an RCBO providing both overload and 30mA fault current protection accessible via a waterproof customer re-set flap, as well as a set of 3 x 35mm incoming cable connection terminals.

Product codes:

- LSAB0010 – SU2 - 16amp – skt – MM
- LSAB0030 – SU2 - 32amp – skt – MM
- LSAB0090 – SU2 - 16amp – skt – SCM
- LSAB0110 – SU2 - 32amp – skt – SCM
- LSAF0060 – 1500mm x 3mm Galv Post – MM units
- LSAF0070 – 1500mm x 3mm Galv Post – SCM units

RU1 Residential Direct Connection Unit

The RU1 is a hard-wearing, cost effective connection unit specifically designed to provide either a 16amp, 32amp or 63amp unmetered electrical supply via its direct connection facility to the residential home.

Each unit comes complete with an RCBO providing both overload and 30mA fault current protection accessible via a waterproof customer re-set flap, a set of 3 x 35mm incoming cable connection terminals, as well as a watertight compression gland to secure the home's supply cable.

Product codes:

- LSAG0010 – RU1 – 40amp – gland
- LSAG0020 – RU1 – 63amp – gland
- LSAF0060 – 1500mm x 3mm Galv Post

TRE Range - Unmetered

The TRE unmetered range is a selection of hard-wearing, cost effective hook-up units specifically designed for use on touring caravan and camping sites. These units are available in 2way, 3way or 4way formats, providing either 10amp, 16amp or 32amp electrical supplies via its BS4343 IP44 electrical sockets.

Each unit comes complete with an RCBO per socket providing both overload and 30mA fault current protection accessible via a waterproof customer re-set flap, as well as a set of 3 x 35mm incoming cable connection terminals.

Product codes:

- LSAH0040 – TRE – 16amp – skt – 2way
- LSAH0050 – TRE – 16amp – skt – 3way
- LSAH0060 – TRE – 16amp – skt – 4way
- LSAF0060 – 1500mm x 3mm Galv Post – 2way
- LSAF0080 – 1500mm x 3mm Galv Post – 3 & 4way

Residential Home Connection Units

RU2 Residential Direct Connection Unit

The RU2 is a hard-wearing, cost effective connection unit specifically designed to provide either a 16amp, 32amp or 63amp metered electrical supply via its direct connection facility to the residential home (optional SmartCard Metering available).

Each unit comes complete with an RCBO providing both overload and 30mA fault current protection accessible via a waterproof customer re-set flap, a set of 3 x 35mm incoming cable connection terminals, as well as a watertight compression gland to secure the home's supply cable.

Product codes:

- LSAG0030 – RU2 – 40amp – gland – MM
- LSAG0040 – RU2 – 63amp – gland – MM
- LSAF0060 – 1500mm x 3mm Galv Post – 40amp unit
- LSAF0080 – 1500mm x 3mm Galv Post – 63amp unit

Touring Hook-Up Units

TRE Range - Metered

The TRE metered range is a selection of hard-wearing, cost effective hook-up units specifically designed for use on touring caravan and camping sites. These units are available in 2way, 3way or 4way formats, providing either 10amp, 16amp or 32amp electrical supplies via the individually kWh metered BS4343 IP44 electrical sockets (optional SmartCard Metering available).

Each unit comes complete with an RCBO per socket providing both overload and 30mA fault current protection accessible via a waterproof customer re-set flap, as well as a set of 3 x 35mm incoming cable connection terminals.

Product codes:

- LSAH0080 – TRE – 16amp – 2way – MM
- LSAH0090 – TRE – 16amp – 3way – MM
- LSAH0100 – TRE – 16amp – 4way – MM
- LSAF0080 – 1500mm x 3mm Galv Post

TR Range – Unmetered & Metered

The TR range is a selection of hard-wearing hook-up units complete with hinged lockable door, specifically designed for use on touring caravan and camping sites. These units are available in metered or unmetered options and offer 2way, 3way or 4way formats, providing either 10amp, 16amp or 32amp electrical supplies via its BS4343 IP44 electrical sockets (metered options include kWh Credit Meters & SmartCard Meters).

Each unit comes complete with an RCBO per socket providing both overload and 30mA fault current protection accessible via a hinged lockable door, as well as a set of 3 x 35mm incoming cable connection terminals.

For more information about the TR range, please use the contact details on the back page.

Classic Hook-Up Bollard – Unmetered

This unmetered Classic Touring Hook-Up Bollard is the world's most popular utility bollard with now over 100,000 sold globally and is specifically designed for use on touring caravan and camping sites.

Each bollard comes complete with an RCBO per socket, providing both overload and 30mA fault current protection accessible via a waterproof customer re-set flap, as well as a set of 3 x 35mm incoming cable connection terminals.

Product codes:

- LSAI0010 – 16amp – skt – 1way
- LSAI0020 – 16amp – skt – 2way
- LSAI0030 – 16amp – skt – 3way
- LSAI0040 – 16amp – skt – 4way
- LSAK0030 – To add LED Lighting
- LSAK0140 – To add a Mini-Meter
- LSAK0040 – To add a Water Tap
- GMCP0010 – Galv Ground Base

Touring & Static Hook-Up Units

SU2 Combi Unit

The SU2 Combi Unit is a hard-wearing, cost effective combination unit specifically designed for static and residential parks and offers a kWh metered electrical hook-up, a metered water supply and an optional compartment to accommodate TV system equipment. This combination unit is designed to bring all of the utility services together in a neat and tidy unit and offers either 16amp, 32amp or 63amp electrical supplies via a BS4343 electrical socket or direct connection facility.

Each unit comes complete with an RCBO providing both overload and 30mA fault current protection accessible via a waterproof customer re-set flap, as well as a set of 3 x 35mm incoming cable connection terminals.

For more information about the SU2 Combi Unit, please use the contact details on the back page.

Touring Hook-Up Bollards

Classic Hook-Up Bollard – Metered

This metered Classic Touring Hook-Up Bollard is the world's most popular utility bollard with now over 100,000 sold globally and is specifically designed for use on touring caravan and camping sites. This versatile hook-up bollard is available in 1way, 2way, 3way or 4way formats, providing either 16amp or 32amp kWh metered electrical supplies via its BS4343 IP44 electrical sockets (optional SmartCard metering available).

Each bollard comes complete with an RCBO per socket, providing both overload and 30mA fault current protection accessible via a waterproof customer re-set flap, as well as a set of 3 x 35mm incoming cable connection terminals.

For more information about the Metered Classic Hook-Up Bollard, please use the contact details on the back page.

Electrical Mains & Distribution Units

Rolec designs and manufactures a wide range of electrical mains panels and distribution units to suit your individual requirements and electrical systems. These panels and units come complete with built-in switchgear, cable terminals and where required, metering and street light operating photocells.

We are able to manufacture these bespoke panels and units to your specification.

WallPod: The Modern Hook-Up Unit

The WallPod Hook-Up Unit is the modern alternative to the traditional grey hook-up box and is able to provide a 16amp or 32amp kWh metered or unmetered supply via a BS4343 IP44 electrical socket.

Each WallPod comes complete with an RCBO providing both overload and 30mA fault current protection accessible via a waterproof customer re-set flap, as well as a set of 3 x 35mm incoming cable connection terminals.

■ Product codes:

- LSWA0010 – 16amp – skt
- LSWA0030 – 32amp – skt
- LSWA0020 – 16amp – skt - MM
- LSWA0040 – 32amp – skt - MM
- LSWA0080 – 1500mm x 3mm Galv Post

■ Park Electrical Distribution and Lighting

Park Lighting

Rolec offers a comprehensive range of amenity lighting solutions including high level and low level versions, ideal for caravan, holiday home and camping parks as well as footpaths, car parks and communal areas.

Contact us for more details about our comprehensive range of lighting options.

■ Product codes:

- LGAA0010 – 1000mm VRL light
- LGAA0020 – 2000mm VRL light

■ WallPod Hook-Ups & Accessories

Electrical & Hook-Up Accessories

With over £1,000,000 worth of products and components stocked at our factory, you will always have instant access to spare and replacement parts, ensuring your park's electrical, hook-up and lighting services are always fully operational. Spare and replacement parts include switchgear, kWh meters, photocells, lamps, cable terminals, access flaps, enclosures, cable, glands, etc.

■ **For more information about Electrical & Hook-Up Accessories, please use the contact details on the back page.**

SmartCard Metering

SmartCard Metering is Rolec's best selling and industry leading metering solution and has been specifically designed for the caravan and holiday home park industry. This advanced form of SmartCard metering is the perfect, low cost solution to providing pre-payment electricity metering to both static and touring caravans as well as residential homes.

Contact us for details of SmartCard metering as well as our new computer managed metering system, utilising GSM mobile technology.

For more information about SmartCard Metering, please use the contact details on the back page.

Design, Installation, Testing Services

Rolec was established in 1990 and over the past 25 years has specialised in the design, installation and testing of electrical and lighting services on caravan parks and residential sites throughout the UK.

We are now the nation's largest specialist in the electrical hook-up industry and have the resources, expertise and capability to undertake projects of any size and scope.

SmartCard Metering and EV Charging Points

Electric Vehicle Charging Points

Rolec manufactures and supplies the largest range of electric vehicle charging points in Europe and has developed a low cost electric vehicle charging pedestal, particularly suitable for the caravan and residential park industries.

This EV charging pedestal is able to charge every type of EV and PHEV on the market today and is available in both 1way and 2way, mode 3 Fast Charge formats.

Product codes:

- EVCL2006 – 1way – BasicCharge – 16/32amp
- EVCL2016 – 2way – BasicCharge – 16/32amp
- GMCP0010 – BasicCharge Galv Ground Base
- EVPG0011 – 1way – AutoCharge – 16/32amp
- EVPG0021 – 2way – AutoCharge – 16/32amp
- GMPG0010 – AutoCharge Galv Ground Base

Design, Installation and Testing Services

National Coverage, Local Support

In order to accommodate the ever growing demands of the caravan and residential park industry, Rolec has created a National Partner Network, which is made up of strategically located electrical contractors who have been selected by us for their professional approach and knowledge of the industry.

These Rolec trained partners have our full support and resources at their disposal, providing them with the ability to deliver a corporate service combined with local knowledge, competitive rates and an out-of-hours response service.
