

A Division of Rolec Services Ltd

Quality • Reliability • Innovation

# Rolec Leisure Overview

## THE FIRST NAME IN LEISURE SERVICES

Park lighting

Static hook-up units

**Rolec Leisure Services is a division of Rolec Services Limited, and has firmly established itself as the U.K's leading company specialising in the design, manufacture and installation of electrical hook-ups, distribution and park lighting systems to the caravan park & camping industry.**

Our enviable reputation has been built on 20 years of both continuous product development and collective experience on some of the world's most prestigious leisure industry projects.

As part of our continued desire to offer the right services and solutions to each and every one of our clients, Rolec Leisure Services has recently expanded and created two individually dedicated teams within the company. The first of these teams specialises in being of service to the private park operator and is able to provide individual park owners with solutions tailored to their particular needs, visions and budgets.

The second of these teams is dedicated to taking care of and liaising with corporate park operators who each have their own corporate ideals, structures and preferences as to how to operate a multi-park organisation.

Rolec Leisure Services again leads the way with its forward thinking approach in creating these two unique teams within its structure and we are delighted with the results and feedback being received from our clients.

**Despite the current downturn in the economy, Rolec Leisure Services continues to lead the way in product development with the recent launch of:**

- The new WallPod hook-up unit – the modern alternative to the 25 year old grey box
- The new Baliza hook-up pedestal – a trendy, stylish and innovative pedestal
- The new Smartcard metering system – At last! Low-cost SmartMetering designed specifically for caravan parks

Distribution unit installation

Touring hook-up units

### Products available include:

- Static / touring / residential hook-up units, both metered and unmetered
